

GROUP F WING CAR

Glue: Upstate Speedway races will run using spray glue only. The raceway owner/race director will determine the formula and application of the spray glue.

A. Motors

1. PS4002FK
2. Springs and brushes in the PS 4002FK may be changed. Springs must be of three-coil type from a USRA-approved manufacturer.
3. Motors must remain sealed

B. Chassis

Any Grp 12 chassis. Chassis may not be modified except the pans may be removed.

C. Bodies

Any USRA-approved body may be used.

D. Tires

Any spec hub tire with a maximum retail price of \$18. No waffled tires allowed

E. Gears & Axle

1. Any 64 pitch gear ratio may be used. Drilled gears are permitted.
2. Only solid axles may be used. May have flats.
3. Axles must be a minimum of 3/32 inch in diameter.

F. Bearings

No ball, roller, or other frictionless bearings are allowed.

G. Weight

No minimum weight for Group F
